

Health Home Quality and Utilization Report

Report Information

Element	Description
Member Counts	The number of members eligible for the specific quality measure
SS	Small sample size. Rates are suppressed where denominator is less than 30
N/A	Not Applicable. Measure was not available for calendar year
Statewide	All non-dual, enrolled Health Home members for specified calendar year
Members in this report are enrolled (and non-dual) Health Home members only. Outreach only members are excluded per calendar year.	

Measure Domains	Number of Measures within Domain
Preventive Care	Three measures
Care for Chronic Conditions	Eight measures
Mental Health	Eight measures
Substance Use Disorders	Four measures
Utilization	Seven measures
Avoidable Utilization	Two measures

Performance Goals (PG)

The NYSDOH-HH utilized the 2015 Health Home performance data to calculate performance goals for each performance measure. For measures where the goal is to increase the occurrence and a higher result is desirable, the 90th percentile is used and for measures where the goal is to reduce an outcome or occurrence and a lower result is desirable, the 10th percentile is used.

If data for the measure was not available for 2015, the performance goal was set using the next year's Health Home results. The performance goals were established with the same methodology as above by using Health Home results from 2016, and then determining the 90th or 10th percentiles. Measures that are added in the future will be set to a default of 100%/0% for the first measurement year and then reset using the most recent measurement year's results.

Draft Annual Improvement Targets (AIT)

The NYSDOH-HH has developed draft Annual Improvement Targets for 2018. Annual improvement targets for measures for Health Homes will be established using the methodology of reducing the gap to the goal by 10%. The most current Health Home measurement year (MY) result will be used to determine the gap between the Health Home result and the measure's performance goal, and then 10% of that gap is added to the most current Health Home result to set the annual improvement target for the new MY (2018).

More information will be provided in the Measure Specifications and Reporting Manual planned for a January release. The Statewide and HH specific AIT will be finalized when the Manual is released.

NYS DOH Health Home Quality Measures

Measure	Description
Preventive Care	
Adult BMI Assessment (ABA)	Percent of members (sample of MMC members only), with an OP visit, who had their BMI documented during the measurement year or the year prior to the measurement year
Chlamydia Screening (CHL)	Percent of sexually active young women who had at least one test for Chlamydia during the measurement year
Colorectal Cancer Screening (COL)	Percent of adults who had appropriate screening for colorectal cancer during the measurement year

Care for Chronic Conditions	
Controlling High Blood Pressure (CBP)	Percent of members (sample of MMC members only), who had a diagnosis of hypertension and whose blood pressure was adequately controlled (<140/90) during the measurement year
Comprehensive Diabetes Care - HbA1c Test (CDC)	The percent of members with diabetes who received at least one Hemoglobin A1c (HbA1c) test within the year
HIV/AIDS Comprehensive Care - Syphilis Screening	The percent of members with HIV/AIDS who were screened for syphilis in the past year
HIV/AIDS Comprehensive Care - Viral Load Monitoring	The percent of members with HIV/AIDS who had two viral load tests performed with at least one test during each half of the past year
HIV/AIDS Comprehensive Care - Engaged in Care	The percent of members with HIV/AIDS who had two visits for primary care or HIV-related care with at least one visit during each half of the past year
Medication Management for People with Asthma - 50% Days covered (MMA-50%)	The percent of members with persistent asthma who filled prescriptions for asthma controller medications during at least 50% of their treatment period
Medication Management for People with Asthma - 75% Days covered (MMA-75%)	The percent of members with persistent asthma who filled prescriptions for asthma controller medications during at least 75% of their treatment period
Persistence of Beta-Blocker Treatment after a Heart Attack (PBH)	Percentage of members who were hospitalized and discharged alive with a diagnosis of AMI and who received persistent beta-blocker treatment for six months after discharge

Mental Health	
Antidepressant Medication Management - Acute Phase (84 days) (AMM-Acute)	The percent of members who remained on antidepressant medication during the entire 12-week acute treatment phase
Antidepressant Medication Management - Continuation Phase (180 days) (AMM-Cont)	The percent of members who remained on antidepressant medication for at least six months
Adherence to mood Stabilizers for Individuals with Bipolar Disorder (BMS)	Percentage of patients with bipolar I disorder who received a mood stabilizer medication that had a proportion of days covered (PDC) for mood stabilizer medication ≥ 0.8 during the measurement year

NYS DOH Health Home Quality Measures

Measure	Description
Mental Health cont'd	
Follow Up After Hospitalization for Mental Illness - 7 days (FUH-7)	The percent of discharges for members who were seen on an ambulatory basis or who were in intermediate treatment with a mental health provider within 7 days of discharge
Follow Up After Hospitalization for Mental Illness - 30 days (FUH-30)	The percent of discharges for members who were seen on an ambulatory basis or who were in intermediate treatment with a mental health provider within 30 days of discharge
Adherence to Antipsychotic Medication for Individuals with Schizophrenia (SAA)	The percent of members with schizophrenia who were dispensed and remained on an antipsychotic medication for at least 80% of their treatment period during the measurement year
Follow Up After Emergency Department Visit for Mental Illness - 7 days (FUM-7)	The percent of ED visits for members with a principal diagnosis of mental illness, who had a follow-up visit for mental illness within 7 days of ED visit
Follow Up After Emergency Department Visit for Mental Illness - 30 days (FUM-30)	The percent of ED visits for members with a principal diagnosis of mental illness, who had a follow-up visit for mental illness within 30 days of ED visit

Substance Use Disorders	
Initiation of Alcohol and Other Drug Dependence Treatment (IET-Init)	The percent of members who, after the first new episode of alcohol or drug dependence, initiated treatment within 14 days of the diagnosis
Engagement of Alcohol and Other Drug Dependence Treatment (IET-Engage)	The percent of members who, after the first new episode of alcohol or drug dependence, initiated treatment and had two or more additional services with a diagnosis of alcohol or other drug (AOD) within 30 days of the initiation visit
Follow Up After Emergency Department Visit for Alcohol and Other Drug Dependence - 7 days (FUA-7)	The percent of ED visits for members with a principal diagnosis of alcohol or other drug (AOD) dependence, who had a follow-up visit for AOD within 7 days of ED visit
Follow Up After Emergency Department Visit for Alcohol and Other Drug Dependence - 30 days (FUA-30)	The percent of ED visits for members with a principal diagnosis of alcohol or other drug (AOD) dependence, who had a follow-up visit for AOD within 30 days of ED visit

Utilization	
Ambulatory Care - Emergency Department (AMB-ED)	Utilization of ambulatory care ED visits per 1,000 member months. Does not include mental health- or chemical dependency-related services
Inpatient Utilization (IPU)	Utilization of total acute inpatient stays per 1,000 member months. Does not include mental health- or chemical dependency-related inpatient stays

NYS DOH Health Home Quality Measures

Measure	Description
Utilization cont'd	
Mental Health Utilization (MPT)	Utilization of mental health services per 1,000 member months. Services broken out by inpatient, intensive outpatient/partial hospitalization and outpatient/ED
Nursing Facility Utilization (NFU)	The number of admissions to a nursing facility from the community that result in a short-term (less than 101 days) during the measurement year per 1,000 enrollee months
Primary Care Utilization (PCP)	Utilization of primary care visits per 1,000 member months
Plan All-Cause Readmission (PCR)	The number of acute inpatient stays during the measurement year that were followed by an acute readmission for any diagnosis within 30 days
Prevention Quality Indicator-Chronic Condition Composite (PQI 92)	The total number of hospital admissions for chronic conditions per 100,000 enrollees

Avoidable Utilization	
Potentially Preventable Readmissions (PPR)	The total number of potentially preventable readmission chains per 100,000 enrollees
Potentially Preventable Emergency Visits (PPV)	The total number of potentially preventable emergency visits for ambulatory sensitive conditions per 100 enrollees
